100-Point Scale For Quantifying the Quality of Cannabis Flower & Concentrates

APPEARANCE

- ✓ **Contaminants:**
Any foreign contamination observed
- ✓ **Trichome Density:**
Amount of trichome coverage
- ✓ **Trichome Intactness:**
Preservation of trichomes
- ✓ **Trim:**
Quality of the trimming
- ✓ **Flower Maturity:**
Ripeness of the flower
- ✓ **Structure:**
Density of the flower
- ✓ **Cure:**
State and quality of the cure
- ✓ **Tactile:**
Texture of the sample
- ✓ **Uniqueness:**
The physical traits

AROMA

- ✓ **Clean / Off:**
Any recognized warning signs
- ✓ **Intensity:**
Strength of the aroma
- ✓ **Complexity:**
Depth of layers detected
- ✓ **Cure:**
State and quality of the cure
- ✓ **Age / Storage:**
Integrity of the aroma
- ✓ **Prevalent Aromas:**
Fruit, Floral, Earth, Fuel, Sweet
- ✓ **Essence:**
Name relatable aromas
- ✓ **Uniqueness:**
Rareness of the aromas

FLAVOR

- ✓ **Dry Hit:**
The flavor intensity of the dry hit
- ✓ **Intensity:**
Strength of the flavor
- ✓ **Complexity:**
Amount of layers
- ✓ **Cure:**
State and quality of the cure
- ✓ **Longevity:**
Length of flavor lingers on palate
- ✓ **Body / Mouthfeel:**
Fullness of the smoke
- ✓ **Smoothness:**
Harshness of the smoke
- ✓ **Tastes Like:**
Identify relatable flavor(s)
- ✓ **Uniqueness:**
Rareness of the flavor

EXPERIENCE

- ✓ **Method of Consumption:**
Combustion or vaporization
- ✓ **Quantity Consumed:**
Cannabis consumed
- ✓ **Mental Effect:**
Predominant mental character
- ✓ **Physical Effect:**
Predominant physical character
- ✓ **Aftereffect:**
The residual experience
- ✓ **Intensity:**
Strength of the experience
- ✓ **Duration:**
Length of the experience
- ✓ **Onset:**
How quickly the experience is realized
- ✓ **Uniqueness:**
Rareness of the experience
- ✓ **Enjoyment of Experience:**
Overall enjoyment of the experience

APPEARANCE

The Ganjier shall systematically assess the visual characteristics of a cannabis flower through the defined criteria and a professional grade 10x jeweler's loupe.

Contaminants Observed:

Any foreign contamination

YES

NO

Debris, disease, insects, insect feces

No contaminants observed

Trichome Density:

Amount of trichome coverage

Sparse

Moderate

Dense

0-30% coverage

31-85% coverage

86-100% coverage

Trichome Intactness:

Preservation of trichomes

Few

Many

Dense

0-30% coverage

31-85% coverage

86-100% coverage

Structure:

Density of the flower

Loose

Typical

Tight

Open and airy

Average representation

Notably tighter than average

Trim:

Quality of the trimming

1-4

4.1-7

7.1-10

Poorly Trimmed

Average

Ideally Trimmed

Flower Maturity:

Ripeness of the flower

1-4

4.1-7

7.1-10

Immature

Average

Mature

Cure:

State and quality of the cure

1-4

4.1-7

7.1-10

Degraded

Undercured

Properly Cured

Tactile:

Texture of the sample

1-4

4.1-7

7.1-10

Powdery

Overly Sticky

Oily / Waxy / Sticky

Uniqueness:

The physical traits

Common

Uncommon

Rare

Average appearance

Notably striking visual features

Exceptionally rare visual features

The Ganjier shall systematically assess the olfactory experience of cannabis flower through the defined criteria and a well-trained nose.

Clean / Off:

Any recognized warning signs

Clean

Off

No indication of mold, mildew, urea, or other signs of spoilage

Smells of mold, mildew, urea, or other signs of spoilage

Age / Storage:

Integrity of the aroma

1

2-3

4-5

6-7

8-9

10

Extremely Degraded

Degraded

Borderline Acceptable

Acceptable

Optimum

Extremely Well-Kept

Intensity:

Strength of the aroma

1

2-3

4-5

6-7

8-9

10

Non-Existent

Subtle

Borderline Subtle

Moderate

Powerful

Extremely Powerful

Prevalent Aromas:

Primary aroma category

Fruit

Floral

Earth

Fuel

Sweet

Complexity:

Depth of layers detected

1

2-3

4-5

6-7

8-9

10

Non-Existent

Singular

Borderline Layered

Layered

Complex

Extremely Complex

Essence:

Name relatable aromas

Fruit

Floral

Earth

Fuel

Sweet

Lemon drop, citrus peel

Lavender, rose

Soil, grass, forest floor

Garlic, gasoline, oil tank

Cake, sugar, cookie

Cure:

State and quality of the cure

1-4

4.1-7

7.1-10

Degraded

Undercured

Properly Cured

Uniqueness:

Rareness of the aromas

Common

Uncommon

Rare

Commonly encountered

Notably uncommon

Exceptionally rare

FLAVOR

The Ganjier shall distill the essence of the gustatory experience of the cannabis flower through the defined criteria and a well-trained palate.

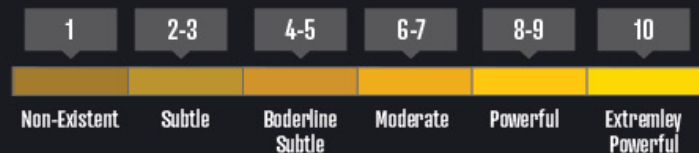

Dry Hit:

The flavor intensity of the dry hit

Intensity:

Strength of the flavor upon consumption

Complexity:

Amount of layers in the flavor

Cure:

State and quality of the cure

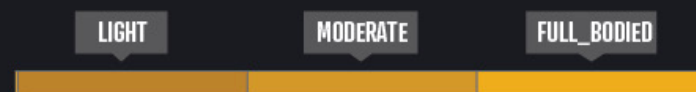

Longevity:

How long the flavor lingers on the palate

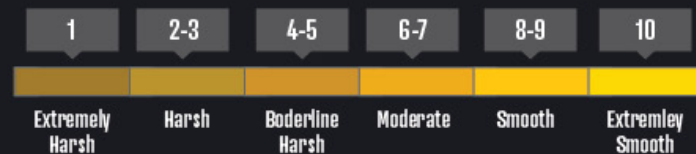

Body / Mouthfeel:

Fullness of the smoke

Smoothness:

Harshness of the smoke

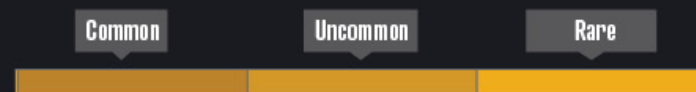

Tastes Like:

Identify relatable flavor(s)

Uniqueness:

Rareness of the flavor

EXPERIENCE

Method of Consumption

Combustion

Vaporization

Quantity Consumed:

Cannabis consumed during the assessment

Log in total grams

Mental Effect:

Predominant mental character of the experience

Relaxed

Balanced

Stimulating

Physical Effect:

Predominant physical character of the experience

Relaxed

Balanced

Stimulating

Enjoyment of Experience:

On a scale 1-10, rate the overall enjoyment of the experience

1

2-3

4-5

6-7

8-9

10

The Ganjier unravels the complexities of quantifying the physical and mental effects of cannabis in order to provide the highest level of service to consumers.

Onset:

How quickly the experience is realized

Rapid

Moderate

Delayed

Took less than 5 minutes

Took longer than 5, but under 15 minutes

Took longer than 15 minutes

Intensity:

Strength of the experience

Mild

Moderate

Strong

Comparatively light

Typical

Greater than typical

Duration:

Length of the experience

Brief

Moderate

Sustained

Primary effects lasted less than 30 min

Primary effects lasted longer than 30 min but less than 1 hour

Primary effects lasted longer than 1 hour

Aftereffect:

The residual experience

Relaxed

Balanced

Stimulating

Uniqueness:

Rareness of the experience

Common

Uncommon

Rare

Typically expected and predictable

Notably uncommon experience

Exceptionally rare experience

100-Point Scoring System

Upon completion of assessment, the SAP App calculates a final score based on a 100 point system, and prepares a report that quantifies the quality of the cannabis flower or concentrate sample.

Coupled with our Certified Ganjier training, this information empowers the Ganjier to deliver meaningful information that is essential to consumers at every level, from the cannabis novice to the contemporary connoisseur, as well as the industry professional.
